EDUCATION

University of California, Irvine

Bachelor of Science, Computer Science

Sep 2023 - Jun 2027

Irvine, CA

• **GPA:** 3.9

• **Coursework:** Advanced Computer Networks, Software Testing & Quality Assurance, Digital Logic Design

EXPERIENCE

Roblox

Jun 2026 - Sep 2026

Software Engineer Intern

San Mateo, CA

- Analyzed and profiled C++ engine subsystems using internal performance tooling to identify CPU, memory, and frame-rate bottlenecks across high-concurrency environments.
- Designed synthetic workload scripts to simulate peak user traffic, identifying system limits and validating latency optimizations prior to deployment.
- Contributed to technical spec reviews and automated regression suites aimed at maintaining high-throughput stability for millions of concurrent users.

VN Consulting

Jun 2025 - Sep 2025

Software Engineer Intern

Garden Grove, CA

- Engineered responsive user interfaces for a client-facing healthcare application using React, Ruby, and JavaScript, contributing to a 5-person Agile team.
- Integrated front-end components with RESTful APIs using Ruby and SQL to securely fetch, display, and update sensitive patient data, collaborating with backend engineers to define API contracts.
- Contributed to a patient portal application used by over 1,000 users, building features that directly improved patient access to their health information.

DataAnnotation

Sep 2024 - Jun 2025

AI/LLM Trainer - Coding Specialist

Remote

- Improved LLM code generation by evaluating and ranking thousands of AI responses in Python, JavaScript, and C++ for correctness, efficiency, and adherence to best practices.
- Conducted adversarial testing (“red-teaming”) on AI models to document unsafe code generation patterns.

PROJECTS

Lector

LA Hacks 2026

- Built a learning platform that helps users practice code-reviews through security labs and code-reviews.
- Engineered a sandboxed grading pipeline with Docker that applies user patches inside ephemeral containers and verifies fixes by replaying exploits or running bug-exposing tests.

VERITABLE ARMY <https://veritable-army.onrender.com>

- Implemented a synthesis module where a master AI analyzes and consolidates responses from individual AI models, providing users with a unified and reasoned answer.
- Engineered a Flask-based backend to orchestrate calls to multiple AI APIs (OpenAI, Google, Anthropic).

TECHNICAL SKILLS

- **Languages:** Python, C, C++, SQL, JavaScript, HTML/CSS, R, Ruby, Verilog
- **Frameworks:** React, Node.js, Flask, JUnit, WordPress, Tailwind, Material-UI, FastAPI
- **Developer Tools:** Git, Google Cloud, Cursor, VS Code, GPT Codex, Claude Code, PyCharm, IntelliJ, Jira, Asana
- **Certifications:** Google IT Support, fCC JavaScript Algorithms and Data Structures, CompTia Network+ (In Progress)

EXTRACURRICULAR ACTIVITIES

Ballroom Dance @ UCI

Sep 2024 - Present

Treasurer

- Managed a club budget, coordinated fundraising initiatives, and handled financial reporting for a team of dancers.

Cyber @ UCI

Dec 2023 - Present

Member

- Engaged in hands-on workshops covering network security, ethical hacking, and digital forensics.
